Hi, Matt, good talking to you. Todd Hennis, owner of the Gold King Mine, would love to talk with the Administrator while she's here today. If not in person, a phone call would be great.

Besides discussing his relationship with EPA through the years, I believe he would like to discuss creating a viable long term solution to the Sunnyide Mine Pool problem that doesn't endanger the innocent, adjoining landowners or the people of San Juan County. He is concerned about a potential larger problem with this mine pool.

Do you think we could make a short discussion possible? I think it makes sense on a lot of levels.

Thanks,

Wendy
